25X1

The SIEMENS Works, BUDAPEST.	
1. This works is located at 128 GYOMROI UT., BUDAPEST.	
Current production includes:	25 <b>X</b> 1
(i) Blectric switchgear; switchgear designed	
for voltages up to 350v and for 60, 100, and 200 amps whese	05)//
were forcranes (mainly for dockyards) up to 10 .ons.	25 <b>X</b> 1
(ii) Electric motors up to 200 h.p.	
(iii) Blower equipment (using SIEMENS motors) for steel works,	
power stations and locomotives.	
(iv) Flame-proof switchboxes for mines.	
(v) Cables - power transmission and telecommunication.	
(vi) Electric furnaces for steel works. Capacity about	
200 cu.m. temperature up to 2,000°C.	
(vii) Shell cases and fuses. The shell cases were 105 mm.	
and the fuses impact.	
(viii) Domestic appliances, including washing machines.	
	2EV1
2. the works employed 4,000 persons, of	25 <b>X</b> 1
these about 800 were engaged on motor production; 1,200 in	
the cable works, and 300 in the department manufacturing shell	
cases, fuses and possibly other secret military equipment.	
3. Production figures and Destinations.	
the following approximate production	25X1
figures:	
(a) <u>Motors</u> : 1-10h.p. 8-10,000 per year. Above 10h.p. very	
approximately 50 per year.	
(b) Blower equipment: No figures, production largely exported	
to U.S.S.R., CZECHOSLOVAKIA and POLAND.	
(c) Oables: A considerable quantity of various types made for	
the Hungarian Army. Production of PUPIN cables (copied from	
G.E.C.) probably about 10,000 m. per month.	
(d) Electric furnaces: Production 15-20 per year. Exported to	
U.S.S.R. and Soviet bloc. At outbreak of revolution 20 furnaces	
for CZECHOSLOVAKIA wore helf completed.	
(e) Flrma-proof switchboxes were exported to the U.S.S.R.	
(f) Shell cases and fuses: No further knowledge beyond the	
fact that sabotage"	25 <b>X</b> 1
(details unknown) had accurred frequently in this department	
during 1956.	25 <b>X</b> 1

4. During 1953 the factory was producing walkin-talkin radio sets copying a German war-time model (no further details known).  5. Personnel. Factory Manager.  VASADI, Leszlo.  Production Manager.  Production Manager.  BANHEGYI, Leszlo, known as BRUCK, Laszlo.  Factory Monager.  Design Chief.  Production Manager.  BANHEGYI, Leszlo, known as BRUCK, Laszlo.  The work of the laboratory was essentially devoted to the copying of motors, switchgear and cables to Anglo—American designs.  No Russians were employed in the works, Fact many visitors from the U.S.S.R. came to the works. They were civilian clothes and appeared to be interested mainly in the cable and design departments.	25. 25.

	25.
There were serious shortages of Copper, Molybdenum, Tungsten, Lead and Bakelite. Every attempt was made to use Aluminium as a substitute for copper, even in motor windings. Due to poor materials considerable trouble was experienced with enamal insulation.	
7. Plant Layout.  A rough sketch plan of the works  at Appendix 'A' to this report.	25.
8. Associated Factories.  X-ray equipment was produced by the associated firm of SIEMENS-REINIGER.  the annual production was about 100 sets per year,

The SIEMENS Works, 128 GYOMROI Ut., BUD/PEST.

NOT accurately to scale. Scale: Very approximately lem. = 20m.

```
Logond
\overline{a - L.V.H.} offices (1 floor)
b - T.W. offices (1 floor).
c - 2-Storey Management block. First aid post on ground floor.
d - Production of household appliances and flame-proof switchboxes
     (1-storey).

    e - Scotion producing military equipment (2-storey).
    c'- Restricted zone within e, employing 80-150 persons.

f - Canteen.
  - Wood-work shop (cable drums, mouldsete.) (1-storey).
h - Motor production (1-storey)
i - Design and Drawing office (4-storey).
i'- Design and Drawing office (1-storey).
j - Ground floor switchgoar. 1st. floor laboratory.
                                 lst. floor fuseboxes etc.
k - Ground floor cables.
1 - Accounts (1-storcy).
m - Grta-kacper.
n - Gato.
o - Yard with foundries, stores, warehouses atc.
